

23.11.20

Dear Parents

We are excited to launch 4 weeks of Active Travel at school. This challenge looks different across the school.

In Key Stage 1 the children have been given a challenge booklet. In this booklet they can record what they have seen or heard on their way to school, regardless of whether you drive to school or walk. Parents in Key Stage 1 have the option to use a wrist pedometer to encourage children to be active however Key Stage 1 steps will not be entered into the competition. If you would like a wrist strapped pedometer then please collect one from your child's class teacher. Please note that at this moment these are only available to parents across year 1 and 2.

Across Key Stage 2 the children have watched an exciting new bulletin to launch the active travel competition. Research suggests that children in Key Stage 2 can have a bigger influence on lifestyle changes. Therefore to support our children in becoming active they will have received their very own pedometer and challenge booklet. Each day the total number of steps per class will be recorded and added to the school total. Please do not reset the pedometer as the children will be doing this in class once their total has been logged.

This is a Bradford wide initiative that has been developed by JU:MP to encourage children to engage in Active Travel. Moving forward we hope that we can continue to support our children in being as active as they can.

Thank you for your continued support.

Kind Regards

Head of School
