

Year 4 – Design and Technology Overview

Topic	Textiles – Fastenings With an Egyptian design	Electrical systems – Torches	Digital world - Mindful moments timer
Linked Books			
Designer/Architect/Engineer	<p data-bbox="524 651 813 679">Hassan Sheheryar Yasin</p> 	<p data-bbox="1167 651 1339 679">Nikola Tesla</p> 	<p data-bbox="1659 651 1939 679">Bill Gates /Edith Clarke</p> 
Substantive knowledge			
<p data-bbox="185 1214 300 1243">Technical</p>	<ul data-bbox="344 1070 898 1385" style="list-style-type: none"> • To know that a fastening is something which holds two pieces of material together for example a zipper, toggle, button, press stud and velcro. • To know that different fastening types are useful for different purposes. • To know that creating a mock up (prototype) of their design is useful for checking ideas and proportions. 	<ul data-bbox="943 1070 1518 1353" style="list-style-type: none"> • To understand that electrical conductors are materials which electricity can pass through. • To understand that electrical insulators are materials which electricity cannot pass through. • To know that a battery contains stored electricity that can be used to power products. • To know that an electrical circuit must be complete for electricity to flow. 	<ul data-bbox="1547 1070 2051 1385" style="list-style-type: none"> • To understand what variables are in programming. • To know some of the features of a Micro:bit. • To know that an algorithm is a set of instructions to be followed by the computer. • To know that it is important to check my code for errors (bugs).

Year 4 – Design and Technology Overview

		<ul style="list-style-type: none"> To know how a switch can be used to complete and break an electrical circuit. 	<ul style="list-style-type: none"> To know that a simulator can be used as a way of checking your code works before installing it onto an electronic device.
Additional		<ul style="list-style-type: none"> To know the features of a torch: case, contacts, batteries, switch, reflector, lamp, lens. To know facts from the history and invention of the electric light bulb(s) - by Sir Joseph Swan and Thomas Edison. 	<ul style="list-style-type: none"> To understand the terms 'ergonomic' and 'aesthetic'. To know that a prototype is a 3D model made out of cheap materials, that allows us to test design ideas and make better decisions about size, shape and materials.
Skills			
Design	<ul style="list-style-type: none"> Writing design criteria for a product, articulating decisions made. Designing a personalised book sleeve. 	<ul style="list-style-type: none"> Designing a torch, giving consideration to the target audience and creating both design and success criteria focusing on features of individual design ideas. 	<ul style="list-style-type: none"> Writing design criteria for a programmed timer (Micro:bit). Exploring different mindfulness strategies. Applying the results of my research to further inform my design criteria. Developing a prototype case for my mindful moment timer. Using and manipulating shapes and clipart by using computer-aided design (CAD), to produce a logo. Following a list of design requirements.
Make	<ul style="list-style-type: none"> Making and testing a paper template with accuracy and in keeping with the design criteria. Measuring, marking and cutting fabric using a paper template. Selecting a stitch style to join fabric. Working neatly by sewing small, straight stitches. Incorporating a fastening to a design. 	<ul style="list-style-type: none"> Making a torch with a working electrical circuit and switch. Using appropriate equipment to cut and attach materials. Assembling a torch according to the design and success criteria. 	<ul style="list-style-type: none"> Developing a prototype case for my mindful moment timer. Creating a 3D structure using a net. Programming a micro:bit in the Microsoft micro:bit editor, to time a set number of seconds/minutes upon button press.

Year 4 – Design and Technology Overview

<p>Evaluate</p>	<ul style="list-style-type: none"> • Testing and evaluating an end product against the original design criteria. • Deciding how many of the criteria should be met for the product to be considered successful. • Suggesting modifications for improvement. • Articulating the advantages and disadvantages of different fastening types. 	<ul style="list-style-type: none"> • Evaluating electrical products. • Testing and evaluating the success of a final product 	<ul style="list-style-type: none"> • Investigating and analysing a range of timers by identifying and comparing their advantages and disadvantages. • Evaluating my Micro:bit program against points on my design criteria and amending them to include any changes I made. • Documenting and evaluating my project. • Understanding what a logo is and why they are important in the world of design and business. • Testing my program for bugs (errors in the code). • Finding and fixing the bugs (debug) in my code.
<p>New Vocabulary</p>	<p>Aesthetic, assemble, book sleeve, design criteria, evaluation, fabric, fastening, mock-up, net, running-stitch, stencil, target audience, target customer, template.</p>	<p>Battery, bulb, buzzer, cell, component, conductor, copper, design criteria, electrical item, electricity, electronic item, function, insulator, series circuit, switch, test, torch, wire.</p>	<p>2D, advantage, assemble, block, brand identity, branding, bug, CAD, cheap, clipart. Coding, criteria, debug, design, develop, disadvantage, ergonomic, evaluate, form, function, instructions, join, logo, loop, mindfulness, model, net, pause, process, program, prototype, research, sketchpad, template, test, timer, user, variable</p>
